Q2

First n perfect numbers

10 marks

Q3

Decimal number equivalent to binary number and octal number

10 marks

Q4

nth max number and nth min number in array then sum of it and difference of it

10 marks

Q5

Find the average positive and negative numbers upto -1

10 marks

Q6

Removing duplicates in array

10 marks

Q7

Matrix multiplication

10 marks

Your Code

```
1 import java.util.Scanner;
2 public class Main {
3     public static void main(String[] args) {
4         Scanner sc = new Scanner(System.in);
5         int n = sc.nextInt();
6         int count = 0;
7         int num = 2;
8         while (count < n) {
9             int sum = 0;
10            for (int i = 1; i <= num / 2; i++) {
11                if (num % i == 0) {
12                    sum += i;
13                }
14            }
15            if (sum == num) {
16                System.out.print(num + " ");
17                count++;
18            }
19            num++;
20        }
21        sc.close();
22    }
23 }
```

JAVA PROGRAMMING

```
1 import java.util.Scanner;
2 public class AveragePosNeg {
3     public static void main(String[] args) {
4         Scanner sc = new Scanner(System.in);
5         double sumPos = 0, sumNeg = 0;
6         int countPos = 0, countNeg = 0;
7         while (true) {
8             int n = sc.nextInt();
9             if (n == -1) break;
10            if (n > 0) {
11                sumPos += n;
12                countPos++;
13            } else if (n < 0) {
14                sumNeg += n;
15                countNeg++;
16            }
17        }
18        if (countPos > 0) {
19            System.out.printf("Average of positive numbers: %.2f\n", sumPos / countPos);
20        } else {
21            System.out.println("Average of positive numbers: 0");
22        }
23        if (countNeg > 0) {
24            System.out.printf("Average of negative numbers: %.2f\n", sumNeg / countNeg);
25        } else {
26            System.out.println("Average of negative numbers: 0");
27        }
28        sc.close();
29    }
}
```

Output

```
Average of positive numbers: 7.75
Average of negative numbers: -5.50
```

The left sidebar contains a list of questions:

- Q3**: Decimal number equivalent to binary number and octal number (10 marks)
- Q4**: Nth max number and nth min number in array then sum of it and difference of it (10 marks) [✓]
- Q5**: Find the average positive and negative numbers upto -1 (10 marks) [✓]
- Q6**: Removing duplicates in array (10 marks) [✓]
- Q7**: Matrix multiplication (10 marks) [✓]

At the bottom left, it indicates "6/7 answered". The bottom status bar shows system information like temperature (35°C), time (11:56), and date (01-08-2026).
